1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
GSRM-PL-1	General Requirements, Polish Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

This section is intentionally left blank.

3 - Background

This Age of Empires II random map exhibits Nieszawa, twin cities in North-Central Poland staring each other down from opposite banks of the Vistula River. This location was selected for its relevance to Polish history, and intriguing split start opportunity.

4 - Overview

This component specification defines requirements for a river-Arena style map, for use in a Polish Map Collection.

5 - General Requirements

The requirements of GSRM-PL-1 apply unless superseded by this specification.

6 - Rule Changes

This section is intentionally left blank.

7 - Land Configuration

Nieszawa shall be arranged per Figure 7 below:

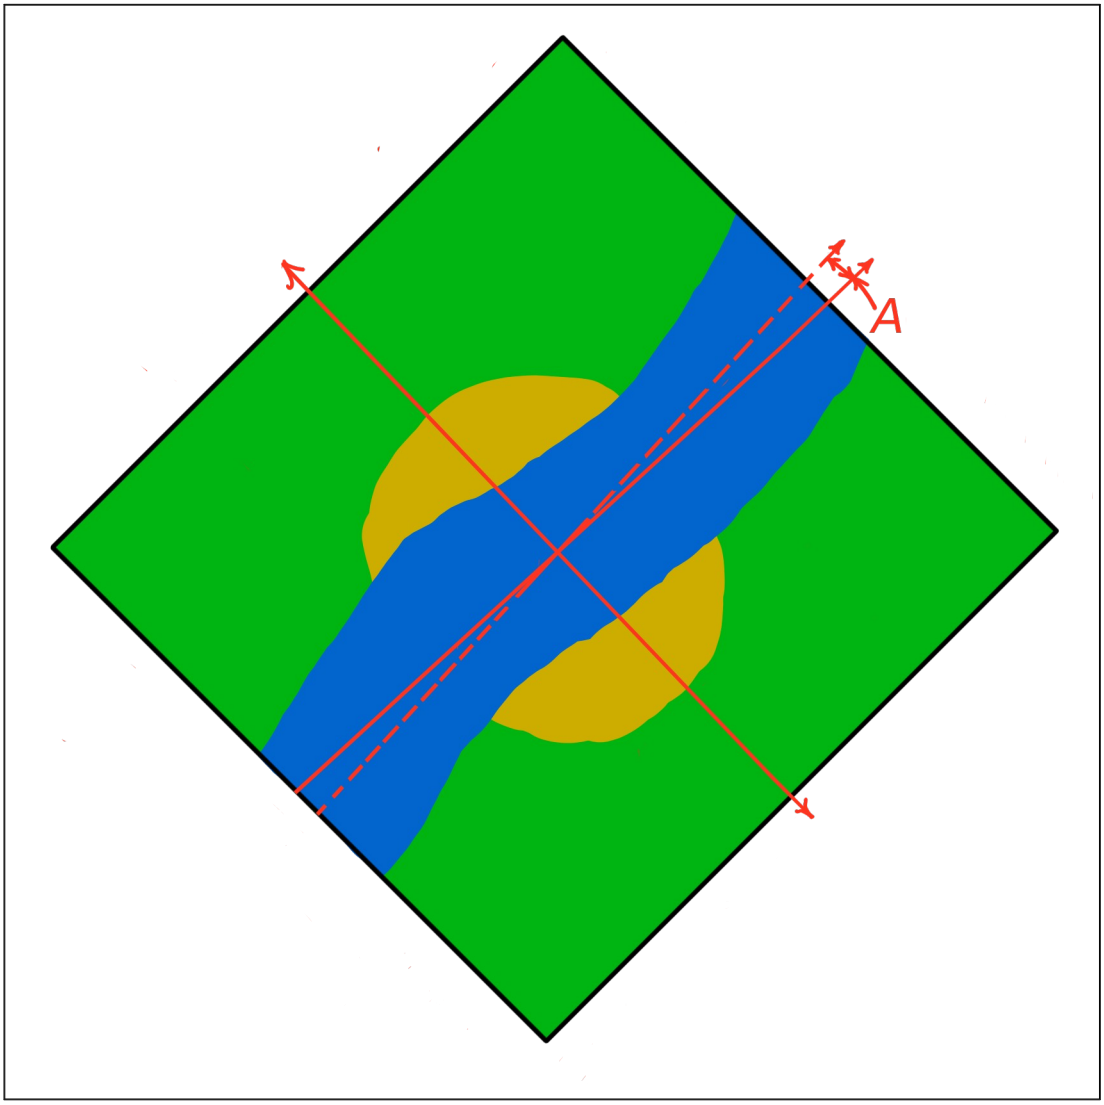

Figure 7: Nieszawa Configuration

7.A - Zoning

In this way, three zones are established, described as follows:

7.A.1 - Plains

The green area.

7.A.2 - City

The tan area.

7.A.3 - River

The blue area, width 20 to 24 tiles.

7.B - Origin of Player Lands

An *Origin of Player Lands* shall be located in each half of the City (§7.A.2), separated by the River (§7.A.3), for a total of two starting locations per player.

7.C - Randomizations

7.C.1 - Rotation

Angle “A” shall have no fewer than sixteen points within a full 360 deg rotation.

7.C.2 - Century

At the beginning of map generation, a random century shall be rolled, with the following equally probable choices:

- 13th Century
- 14th Century
- 15th Century

8 - Elevation

8.A - Plains

The Plains shall be Elevation 1. with scattered hills up to Elevation 3.

8.B - City

The City shall be Elevation 1.

8.C - River

The River shall be Elevation 0.

9 - Terrain

9.A - Plains

Terrain depending on random choice of century rolled in §7.C.2.

9.A.1 - 13th Century

The Plains shall consist of open land terrain with scattered forests and a few roads leading into the paved city.

9.A.2 - Otherwise

Within 1 tile of the River (§7.A.3), the Plains shall consist of reed and willow forest. Otherwise the Plains shall consist of open land terrain with scattered forests and a few roads leading into the city.

9.B - City

Terrain depending on random choice of century rolled in §7.C.2.

9.B.1 - 13th Century

The City shall consist of broken or weathered road terrain only on one side of the River (§7.A.3), with a single-tile reed/willow forest barrier to restrict docking. On the opposite end, terrains shall resemble ordinary 13th Century Plains (§9.A.1), indicating settlement on only one side of the river by that time.

9.B.2 - Otherwise

The City shall consist of broken or weathered road terrain on both sides of the River (§7.A.3), each with its own single tile barrier of reed/willow forest to restrict docking.

9.C - River

The River shall consist of seasonal water per GSRM-PL-1, regardless of century.

10 - Objects

10.A - Starting Units

10.A.1 - 13th Century

Each player shall start the game controlling objects defined by Table 10.A.1. All objects placed on the roaded side of the river:

Object	Per Applicable Specification	Distance from First *Origin of Player Lands* [tiles]	Quantity
Town Center	~	0	1
Herdable	GSRM-PL-1	2 to 3	4
Villager	~	6	3
Harmful Scout	GSRM-PL-1	4 to 9	1

Table 10.A.2: Starting Player-Controlled Objects

10.A.2 - Otherwise

Each player shall start the game controlling objects defined by Table 10.A.2. Note that the presence of "∞" indicates an object to be on the "opposite" side of the river from where numerical avoidance is given. Also note that the "Second *Origin of Player Lands*" centers around a mill instead of a Town Center:

Object	Per Applicable Specification	Distance from First *Origin of Player Lands* [tiles]	Distance from Second *Origin of Player Lands* [tiles]	Quantity
Town Center	~	0	∞	1
Harmful Scout	GSRM-PL-1	4 to 9	∞	1
Mill	~	∞	0	1
Herdable	GSRM-PL-1	∞	1 to 2	§10.A.3
Villager	~	∞	3 to 4	§10.A.3
Watch Tower	~	∞	5 to 6	4
House	~	∞	5 to 6	4
Palisade Ring	~	∞	7	N/A

Table 10.A.2: Starting Player-Controlled Objects

10.A.3 - Quantity by Century

For the 14th century, this quantity shall be 6. For the 15th century, this quantity shall be 12.

10.B - Resources

10.B.1 - By Century

10.B.1.a - 13th Century

This section is intentionally left blank.

10.B.1.b - Otherwise

With exception of shore fish and scant, distant forage bushes, no food resources shall appear on the same side of the River (§7.A.3) as the Town Centers defined in Table 10.A.2. Food resources shall be rich on the Mill side of the River (§7.A.3).

10.C - Great Leaders

Nieszawa shall implement the Great Leaders defined by Table 10.C in the non-interactive style of GSRM-PL-1:

Century	Hero Name	String IDs	Accompanying Gaia Unconvertible Building
13th	Hermann von Salza	HvS	Watch Tower (81)
14th	Wladyslaw II Jagiello	WsJ	Castle (84)
15th	Jagiellon	CfJ	Castle (84)

Table 10.C: Centuries of Great Leaders

These heroes shall inhabit the approximate midpoint between two opposing team Town Centers, during their appropriate century.

10.D - Community

Some aspects of Nieszawa's Community changed over the centuries. The following sections describe what and how.

10.D.1 - Walls

Where bordering Plains, the City shall feature a contiguous unconvertible gaia wall of single tile thickness, with openings only near the intersection of roads, and to accommodate player secondary bases. Wall material shall depend on century, per Table 10.D.1:

Century	Wall Type	Constant ID
13th	Fortified Palisade	121
14th	Stone	119
15th	Fortified	157

Table 10.D.1: Nieszawa Walls Throughout the Centuries

10.D.2 - Buildings

A blend of relevant gaia unconvertible Buildings satisfying the requirements of GSRM-PL-1 shall populate the Community, fitting within the following style categories:

- 13th century → “Feudal” Style
- 14th century → “Castle” Style
- 15th century → “Imperial” Style
