1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
GSRM-PL-1	General Requirements, Polish Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

This section is intentionally left blank.

3 - Background

This Age of Empires II random map shows Biebrza, a swirling river with many oxbows in the wetlands of Northeastern Poland.

4 - Overview

This component specification defines requirements for a water Nomad style map, use in a Polish Map Collection.

5 - General Requirements

The requirements of GSRM-PL-1 apply unless superseded by this specification.

6 - Rule Changes

6.A - Resize Domain

Biebrza shall be randomly resized to a total area that is between 10% and 30% larger than the unmodified area of its selected vanilla size. For example, a “TINY” map, which is normally 120 tiles along its edge becomes 131 +/- 5 tiles, a “SMALL” map, which is normally 144 tiles along its edge becomes 158 +/- 6 tiles, and so on. All integer choices shall be possible, within required windows.

6.B - Stormy Dog

Any Stormy Dog (862) placed on Biebrza shall have its graphics removed to be invisible, but imparted a hero glow.

7 - Land Configuration

Biebrza shall be arranged per Figure 7 below:

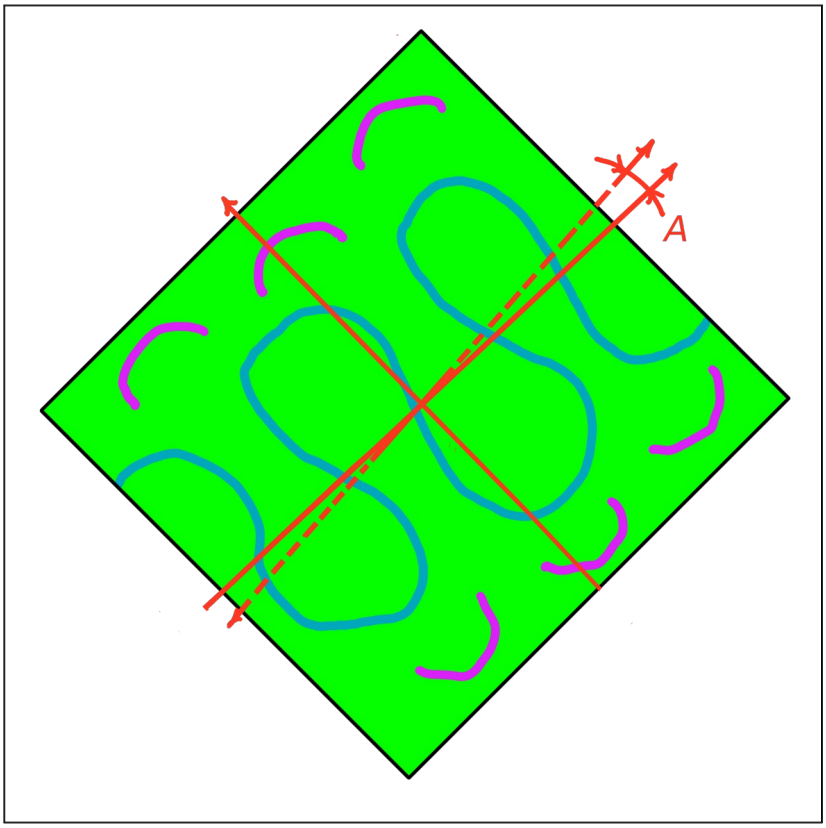

Figure 7: Biebrza Configuration

7.A - Zoning

In this way, three zones are established, described as follows:

7.A.1 - Outland

The green area.

7.A.2 - River

The blue area.

7.A.3 - Oxbows

The purple area, arranged randomly with curvature aligned against §7.A.2.

7.B - Origin of Player Lands

The location of the *Origin of Player Lands* is immaterial.

7.C - Randomizations

7.C.1 - Rotation

Angle “A” shall have no fewer than sixteen points within a full 360 deg rotation.

7.C.2 - Amplitude

The amplitude of each River bend shall vary by up to 25% of the map edge length.

7.C.3 - Oxbows

The combined area of Oxbows (§7.A.3) and River (§7.A.2) shall be selected such that the remaining area belonging to all other zones remains constant at the vanilla benchmark for selected map size; E. G. a “TINY” map non-Oxbows area is 14400 tiles regardless of randomly selected dimensions from §6.A.

8 - Elevation

8.A - Outland

The Outland shall be Elevation 0, with sparse mounds up to Elevation 1.

8.B - River

The River shall be Elevation 0.

8.C - Oxbows

The Oxbows shall be Elevation 0.

9 - Terrain

9.A - Outland

The Outland shall consist of open land terrain with dense forests, with temperate wetland emphasis.

9.B - River

The River shall consist of seasonal water per GSRM-PL-1 with the following exception: if a season would allow for deep, unwalkable water, then it shall be replaced with shallows and/or mangrove shallows.

9.C - Oxbows

The Oxbows shall adopt the same terrain as the River described in §9.B.

10 - Objects

10.A - Starting Units

Each player shall start the game controlling objects defined by Table 10.A:

Object	Per Applicable Specification	Distance from *Origin of Player Lands* [tiles]	Quantity
Villager	~	N/A	3
Harmless Scout	GSRM-PL-1	N/A	1

Table 10.A: Starting Player-Controlled Objects

10.B - Resources

This section is intentionally left blank.

10.C - Great Leaders

Biebrza shall implement Lithuanian hero “Kestutis” [KoL] and a small entourage in the non-interactive style of GSRM-PL-1, avoiding the *Origin of Player Lands* by no less than 45 tiles.

10.D - Will-O-Wisps

Four “Stormy Dog”s (862) shall be placed on the map, avoiding the *Origin of Player Lands* by no less than 45 tiles. Quantity scaled to map size.
