1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-AK-3</u>	General Requirements, Alaska Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines requirements for a gold rush style map on the Yukon River, representing Yukon Gold Rush in an Alaska map pack.

4 - General Characteristics

The requirements of GSRM-AK-3 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Yukon Gold Rush shall be arranged per Figure 6 below, with all blue shades representing water:

Figure 6: Yukon Gold Rush Configuration

6.A - Zoning (Definitions)

Two zones are established, described as follows:

6.A.1 - River

Light blue line, speckled with yellow, cutting the map into approximately equal halves. The angular orientation of the River around the center of the map is immaterial.

6.A.2 - Player Lands

Any area that is not the River. Contains the *Origin of Player Lands*.

6.B - Randomizations

This section is intentionally left blank.

7 - Elevation

7.A - River

The River shall be elevation 0.

7.B - Player Lands

The Player Lands shall be elevation 1, with occasional excursions up to 2 and/or 3.

8 - Terrain

8.A - River

Any location where water meets land shall be a variant of gravel beach, with ships unable to travel above elevation 0. The entirety of remaining terrain shall be walkable and navigable (shallows).

8.B - Player Lands

Land terrain shall be a variant of grass, with dense boreal or temperate forests.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Sheep	~	4 to 6	2
Villager	~	4 to 6	3
Harmless Exploration Unit	<u>GSRM-AK-3</u>	7 to 9	1
Mining Camp	~	Variable – On River	1
Villager	~	Variable – within 12 tiles of Mining Camp, on or near River	3

Table 9.A: Starting Player-Controlled Objects

9.B - Neutral Gold

The majority of neutral gold shall be located on or near the River.
