1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-AK-3</u>	General Requirements, Alaska Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines a coastal glacier map representative of the Columbia Glacier used in an Alaska map pack.

4 - General Characteristics

The requirements of GSRM-AK-3 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

5.A - Gaia Monks

Gaia Monks (with AOE1 priest skin), shall be augmented by the effects of the following technologies: Block Printing, Atonement, Redemption, Faith, & Theocracy.

6 - Land Configuration

Columbia shall be arranged per Figure 6 below, with all blue shades representing water or ice:

Figure 6: Columbia Configuration

6.A - Zoning (Definitions)

Six zones are established, described as follows:

6.A.1 - Glacier

Forked azure area.

6.A.2 - Moraine

Golden “smiley face”.

6.A.3 - Bay

Light blue and dark blue area enveloping the terminal Moraine.

6.A.4 - Basin

Tan area sandwiched between the Glacier and the Bay, bounded by purple lines.

6.A.5 - Outcropping

Tan are straddled by the Glacier and heavily specked with white dots.

6.A.6 - Player Lands

Any area not belonging to the other zones. Contains the *Origin of Player Lands*.

6.B - Randomizations

This section is intentionally left blank.

7 - Elevation

Columbia is a river valley with the following characteristics:

7.A - Glacier

The Glacier shall be elevation 4, excluding an abrupt transition to elevation 0 where it meet the Basin.

7.B - Moraine

The Moraine shall rise to a minimum elevation 2 from the bay.

7.C - Bay

The Bay shall be elevation 0.

7.D - Basin

The Basin shall be elevation 0.

7.E - Outcropping

The Outcropping shall be flat and at elevation 8, except for a sharp transition to the Glacier.

7.F - Player Lands

The Player Lands shall vary from elevation 3 near the coast to 9 further inland.

8 - Terrain

All coastlines in Columbia shall be gravel or rock, with the following localized requirements:

8.A - Glacier

The Glacier shall be ice with snow masking.

8.B - Moraine

The Moraine shall be an appropriate combination of dirt, dry grass, gravel, or rock.

8.C - Bay

The Bay shall consist of navigable water, with shallows extending 4 to 6 tiles beyond beach terrain making it impossible to “dock wall” the land/water boundary. Patches or individual tiles of ice shall be present in the bay.

8.D - Player Lands

Forests shall feature a combination of temperate and boreal trees, and increase in density with elevation and distance from the coastline.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Sheep	~	4 to 6	4
Villager	~	4 to 6	3
Harmless Exploration Unit	<u>GSRM-AK-3</u>	6 to 8	1

Table 9.A: Starting Player-Controlled Objects

9.B - Basin

The Basin shall contain a high concentration of neutral deer.

9.C - Moraine

The Moraine shall contain all neutral gold piles with 800 to 1600 resource storage.

9.D - Bay

Glacial meltwater is too cold for most fish species. No fish shall be present in the Bay area between the Basin and Moraine.

9.E - Outcropping

The Outcropping shall contain all relics and be guarded by unconvertible Gaia monks.
