1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-AK-3</u>	General Requirements, Alaska Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines requirements for a Black-Forest-style map inspired by the Kobuk Delta, Alaska.

4 - General Characteristics

The requirements of GSRM-AK-3 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Kobuk Delta shall be arranged per Figure 6 below:

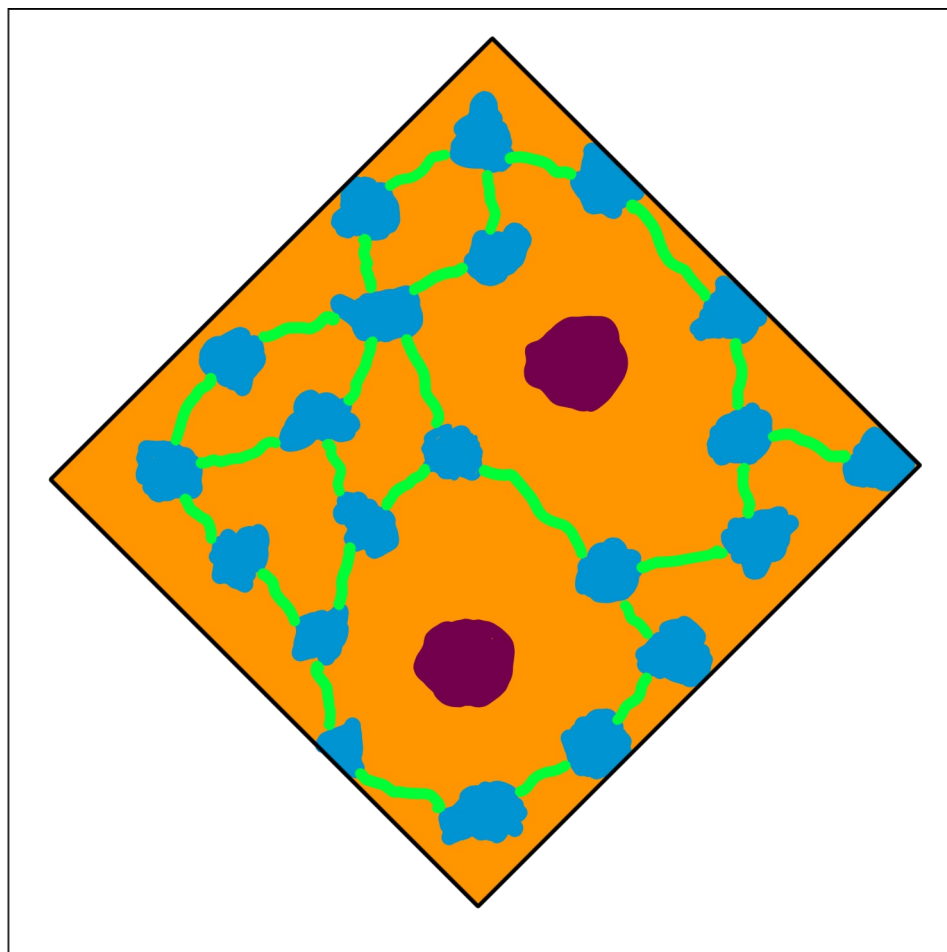

Figure 6: Kobuk Delta Configuration

6.A - Zoning (Definitions)

Four zones are established, described as follows:

6.A.1 - Mounds

Purple Areas, containing the *Origin of Player Lands* at their respective centers. Although only two Mounds are shown, each player receives their own, such that additional Mounds are created when playing with additional players, forming a random circular pattern.

6.A.2 - Ponds

Blue splotches avoiding Mounds by no less than 12 tiles, and the origin of each other by no less than 20 tiles.

6.A.3 - Channels

Green lines connecting all Ponds eventually.

6.A.4 - Swamp

Any area not belonging to the other aforementioned zones.

6.B - Randomizations

The Ponds described in §6.A.2 shall be randomly positioned, with optional exception of an “anchoring” Ponds in each corner.

7 - Elevation

The entire map shall be at elevation 0, with the following exceptions:

7.A - Mounds

The Mounds shall be elevation 1.

8 - Terrain

8.A - Mounds

The Mounds shall consist of open land terrain, with appearance of dry sand or gravel, masked with mud, snow, or ice in appropriate combination for the season.

8.B - Ponds

The Ponds shall consist of reeds and bushes on mangrove shallow forest in all locations, except terrain further than 4 tiles from the edge of the zone shall be water or navigable ice depending on season.

8.C - Channels

The Channels shall consist of mangrove shallow terrain.

8.D - Swamp

Where bordering Ponds or Channels, the Swamp shall consist of navigable wet beach terrain. Everywhere else, the swamp shall be any open land terrain that resembles wet sand, mud, dirt, and/or grasses. These shall be blended in any appropriate combination with water, leaves, snow, ice, etc., to create the appearance of a seasonal cold bog.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Sheep	~	2 to 3	4
Villager	~	6	3
Harmful Exploration Unit	<u>GSRM-AK-3</u>	6 to 8	1

Table 9.A: Starting Player-Controlled Objects

9.B - Resources

9.B.1 - Ponds

The water/ice terrain of the Ponds shall contain all deep fish on the map, and scarce oysters.
