1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-AK-3</u>	General Requirements, Alaska Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines requirements for a Prairie-style map inspired by the area near Arctic Village, Alaska. It tells the story of a small sleepy arctic Alaskan village surviving another harsh winter.

4 - General Characteristics

The requirements of GSRM-AK-3 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Arctic Village shall be arranged per Figure 6 below:

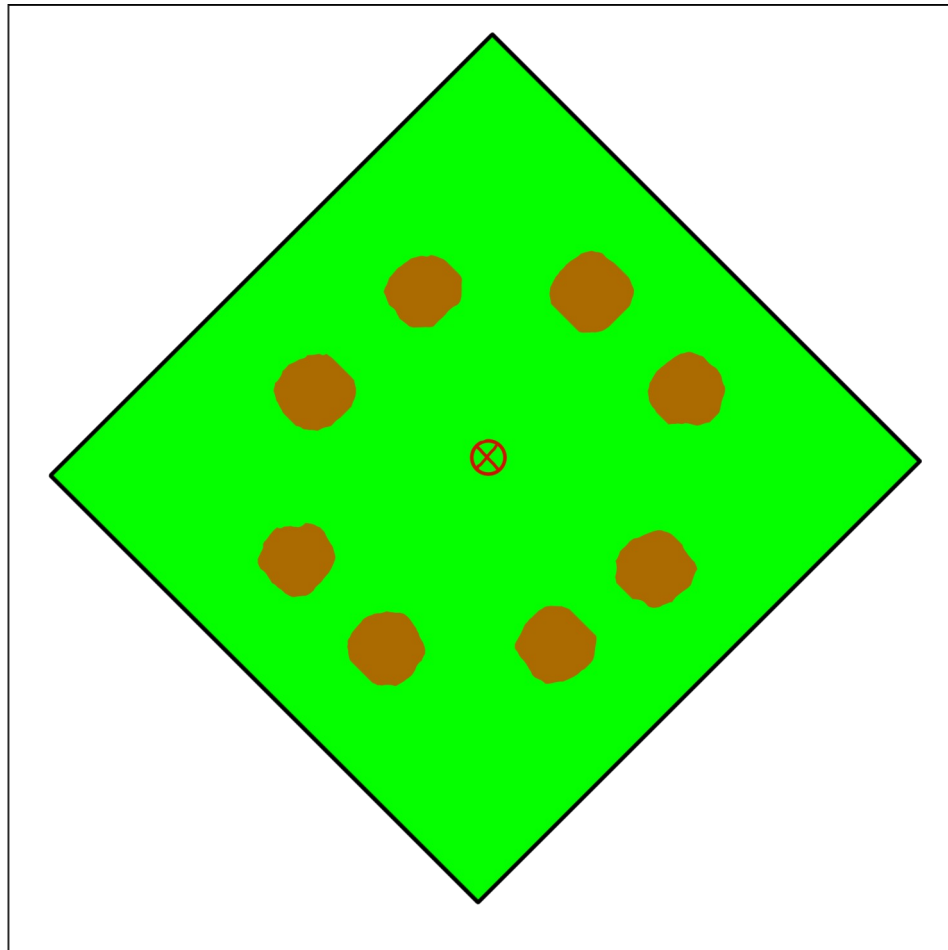

Figure 6: Arctic Village Configuration

6.A - Zoning (Definitions)

Two zones are established, described as follows:

6.A.1 - Village

Dark tan area. Contains the *Origin of Player Lands*. Figure 6 shows arrangement for eight players.

6.A.2 - Outland

Any area not belonging to the other aforementioned zones.

6.B - Randomizations

This section is intentionally left blank.

7 - Elevation

7.A - Village

The Village shall be elevation 0, with a few clumps up to elevation 1.

7.B - Outland

The Outland shall be elevation 0, with a few scattered clumps up to elevation 1 or 2.

8 - Terrain

8.A - Village

The Village shall consist of open land terrain, with the following added detail:

8.A.1 - Forests

Each player shall receive two forests.

8.A.2 - Puddles

Each player shall receive eight single-tile puddles of water terrain.

8.A.3 - Dry-Out

Starting at the edge of the Village and moving toward the *Origin of Player Lands*, terrain in this zone shall become progressively warmer and drier. For example, at boundary which is snow or wet gravel, the terrain should transition to dry gravel or dirt, then finally to dried road in the center.

8.B - Outland

The Outland shall consist of any open land terrain with scattered neutral forests and ponds.

8.C - Forests

Deciduous trees are forbidden.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Sheep	~	2 to 3	4
Villager	~	6	3
Harmful Exploration Unit	<u>GSRM-AK-3</u>	6 to 8	1

Table 9.A: Starting Player-Controlled Objects

9.B - Village

Eye candy objects and unconvertible gaia buildings in the style of an arctic village shall be scattered throughout this area. These objects may include various houses, yurts, tents, barrels, tanning racks, siege camp weapons, graves, broken carts, weapon racks, smoke, bonfires, etc.

9.C - Mountains

Mountain objects with clustered rock/cliff objects shall be scattered within neutral forests far from the Village.

9.D - Player-Tree Objects

Trees in player-assigned forests reskinned per GSRM-AK-3 to have the appearance of lumber/rubbish piles.

9.E - Resources

9.E.1 - Village

Each of the Puddles described in §8.A.2 shall contain a single shore fish. No other immobile resources (such as gold, stone, or berries) shall be located within this approximate circle around the *Origin of Player Lands*.
