1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
GSRM-PL-1	General Requirements, Polish Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

This section is intentionally left blank.

3 - Background

This Age of Empires II random map exhibits a famous anthropogenic desert called Pustynia Bledowska. While the Polish Middle Ages are known for their brutal battles upon lush green meadows, this location was selected to show an accidental, self-imposed injury – a unique area created over years by the fires of medieval industry, ironically meant to enrich and equip the Poles defending those lands.

4 - Overview

This component specification defines requirements of a Border Dispute style map, for use in a Polish Map Collection.

5 - General Requirements

The requirements of GSRM-PL-1 apply unless superseded by this specification.

6 - Rule Changes

6.A - Snakes

Medieval Poles had brown bears, starvation, and crusading Germans to deal with. Snakes (2526) were a nuisance, and are modified thusly:

- Maximum hitpoints reduced FROM 25 TO 3.
- Contain 10 food each.

7 - Land Configuration

Pustynia Bledowska shall be arranged per Figure 7 below:

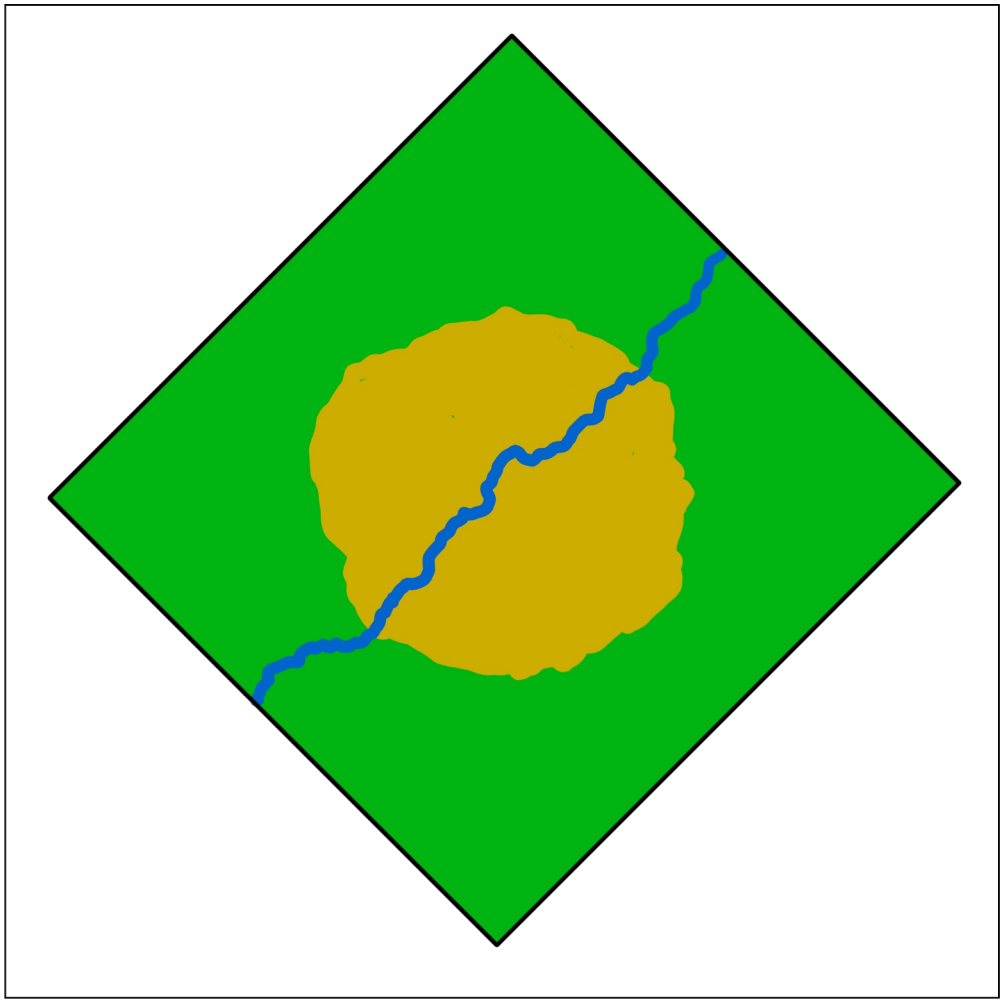

Figure 7: Pustynia Bledowska Configuration

7.A - Zoning

In this way, three zones are established, described as follows:

7.A.1 - River

The blue area.

7.A.2 - Clearing

The tan area.

7.A.3 - Canvas

The green area.

7.B - Origin of Player Lands

The *Origin of Player Lands* shall be located in the Clearing (§7.A.2.).

7.C - Randomizations

7.C.1 - River

Angular arrangement of the River (§7.A.1) shown Figure 7 is arbitrary. Thickness shall be randomly selected as 5, 6, 7, or 8 tiles.

8 - Elevation

8.A - River

The River shall be Elevation 1 within 1 tile of bordering other zones, and Elevation 0 otherwise.

8.B - Clearing

The Clearing shall be Elevation 1, with scattered hills up to Elevation 4.

8.C - Canvas

The Canvas shall be Elevation 1, with scattered hills up to Elevation 4.

9 - Terrain

9.A - River

The River shall consist of unbuildable land terrain, masked with water/ice in combination appropriate for the season to give the appearance of a river. Where this zone transitions to others, swampy terrain is encouraged.

9.B - Clearing

The Clearing shall consist of open land terrain in the style of desert, masked with snow/ice as appropriate for the season.

9.C - Canvas

Within a randomly selected distance of 1, 2, or 3 tiles from any other zone, the Canvas shall consist of forest terrain. Otherwise, it shall be open land terrain, with scattered forests that avoid the boundary forest by at least 1 tile.

10 - Objects

10.A - Starting Units

Each player shall start the game controlling objects defined by Table 10.A:

Object	**Per Applicable Specification**	**Distance from *Origin of Player Lands* [tiles]**	**Quantity**
Town Center	~	0	1
Herdable	GSRM-PL-1	2 to 3	4
Villager	~	6	3
Blacksmith	~	7 to 8	3
Harmless Scout	GSRM-PL-1	4 to 9	1
Mining Camp	~	10 to 22	6

Table 10.A: Starting Player-Controlled Objects

The Mining Camps required by Table 10.A shall avoid all gold and stone deposits by at least 12 tiles, and each other by at least 6 tiles.

10.B - Resources

10.B.1 - Forage

Where the Clearing (§7.A.2) borders the Canvas (§7.A.3), scattered berry bushes shall hug the forest and provide a slow but safe source of food.

10.B.2 - Fish

The River (§7.A.1) shall contain scant shore fish.

10.C - Great Leaders

Within the Clearing of §7.A.2, Pustynia Bledowska shall implement Polish King “Casimir III Wielki” [CtW] inspecting the environmental damage with a small royal entourage, in the non-interactive style of GSRM-PL-1, and avoiding the *Origin of Player Lands* by no less than 25 tiles.

10.D - Snakes

Within 4 tiles of mineable resource piles in the Clearing (§7.A.2), one snake shall be placed per 200 extractable resource (E. G. a pile of 2000 gold is guarded by 10 snakes).
