# 1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

| Specification Number | Nomenclature                   |
|----------------------|--------------------------------|
| <u>GSRM-FIW-1</u>    | General Requirements, FIW Maps |

*Table 1: Bill of Materials*

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

# 2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

# 3 - Background

This Age of Empires II random map loosely represents Louisbourg, Nova-Scotia; a critical sea-base for French North America.

Translated from the native language “Unamakik” means “Land of Fog”, referring to its chilly maritime climate.

# 4 - Overview

This component specification defines requirements for a Frontline-styled map to be used in a French and Indian War Age map pack.

# 5 - General Requirements

The requirements of GSRM-FIW-1 apply unless superseded by this specification.

## 6 - Rule Changes

This section is intentionally left blank.

## 7 - Land Configuration

Unamakik shall be arranged per Figure 7 below:

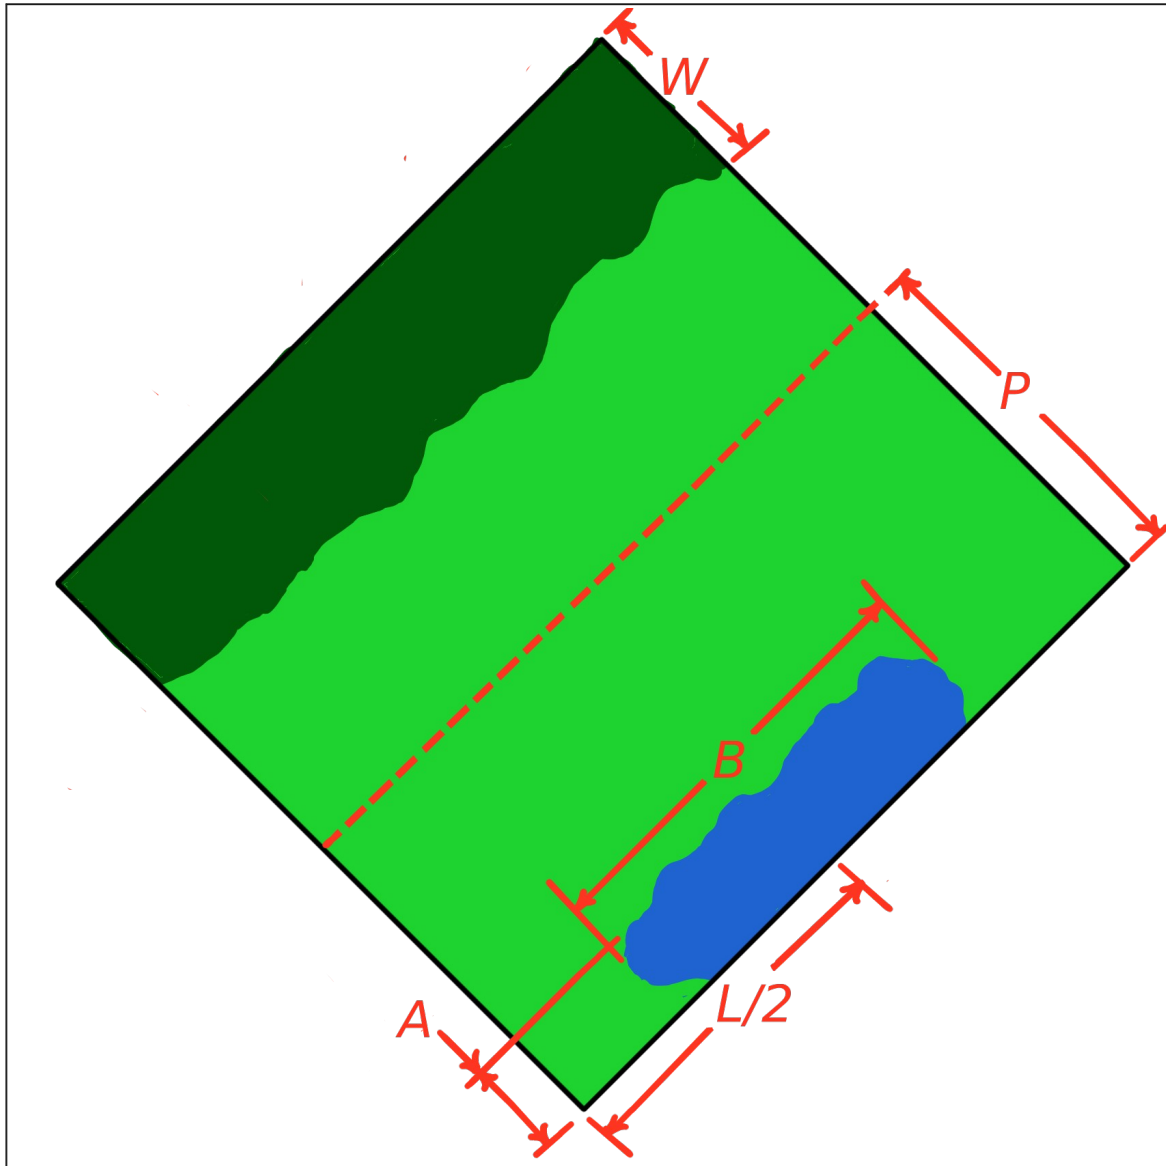

Figure 7: Unamakik Configuration

## 7.A - Zoning

In this way, three zones are established, described as follows:

### 7.A.1 - Bay

The blue area.

### 7.A.2 - Plains

The light green area.

### 7.A.3 - Wilderness

The dark green area.

## 7.B - Origin of Player Lands

For all players shall be collinear along the red dashed line.

## 7.C - Randomizations

With exception of “L/2”, all indicated dimensions shall be heavily randomized to maximize variety beyond the predictable linear starting locations described in §7.B.

## 8 - Elevation

### 8.A - Bay

The Bay shall be Elevation 0.

### 8.B - Plains

The Plains shall be elevation 4 with scattered hills.

### 8.C - Wilderness

The Wilderness shall adopt an elevation of 1 + base elevation of the Plains described in §7.A.2, with an option for scattered hills.

## 9 - Terrain

### 9.A - Bay

The Bay shall consist of seasonal water per GSRM-FIW-1.

### 9.B - Plains

The Plains shall consist of open land terrain, with scattered forests.

### 9.C - Wilderness

The Wilderness shall consist of of forest terrain.

## 10 - Objects

### 10.A - Starting Units

Each player shall start the game controlling objects defined by Table 10.A:

| Object        | Per Applicable Specification | Distance from <i>Origin of Player Lands</i> [tiles] | Quantity |
|---------------|------------------------------|-----------------------------------------------------|----------|
| Town Center   | ~                            | 0                                                   | 1        |
| Herdable      | <u>GSRM-FIW-1</u>            | 2 to 3                                              | 4        |
| Villager      | ~                            | 6                                                   | 3        |
| Harmful Scout | <u>GSRM-FIW-1</u>            | 7 to 8                                              | 1        |

Table 10.A: Starting Player-Controlled Objects

## 10.B - Random Walls

In addition to the objects listed in Table 10.A, Unamakik shall provide a random chance of square of walls to each player.

### 10.B.1 - Type

Table 10.B.1 summarizes probabilities for each type:

| Type               | Chance |
|--------------------|--------|
| No Walls           | 35%    |
| Palisade           | 30%    |
| Fortified Palisade | 20%    |
| Stone              | 15%    |

Table 10.B.1: Wall Probability Breakdown

### 10.B.2 - Size

Walls shall avoid the *Origin of Player Lands* by a randomly selected distance of equal probability between 10 and 20 tiles. In this way, there is a random chance of various player-assigned resources receiving an added layer of protection.

## 10.C - Resources

This section is intentionally left blank.

## 10.D - Fort

A stone-walled fortification per GSRM-FIW-1 shall be placed at the midpoint of the dashed line described in §7.B.
