1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-FIW-1</u>	General Requirements, FIW Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of Town Center.

3 - Background

This Age of Empires II random map concept exhibits the British defeat at Monongahela in the first major battle of the French and Indian War. Major General Edward Braddock was dispatched from England to win a quick victory against French North America. He decided to open with a campaign against several strategic French forts in the disputed Ohio Country area. Braddock mustered 2,100 troops, 10 cannons, supporting supply/baggage trains, and departed Fort Cumberland Maryland personally leading the expedition on its 110 mile journey. Familiar with the open fields of European combat, Braddock and his long column were ambushed within 10 miles of Fort Duquesne by 800 French and Indians on both forested sides of the road they had just built, and were routed after Braddock was mortally wounded.

The name “Monongahela” is derived from the Lenape language meaning “falling banks”, referring to the steep banks of the river near the area of the battle.

4 - Overview

This component specification defines requirements for an Amazon-tunnel style map, inspired by the French and Indian War battlefield near Monongahela.

5 - General Requirements

The requirements of GSRM-FIW-1 apply unless superseded by this specification.

6 - Rule Changes

This section is intentionally left blank.

7 - Land Configuration

Monongahela shall be arranged per Figure 7 below:

Figure 7: Monongahela Configuration

7.A - Zoning

In this way, three zones are established, described as follows:

7.A.1 - Wilderness

The light green area.

7.A.2 - Boundary

The dark green area. Divides players 1, 3, 5, and 7 from 2, 4, 6, and 8, regardless of teaming situation.

7.A.3 - Passage

The tan area.

7.B - Origin of Player Lands

This *Origin of Player Lands* shall be located in the Wilderness (§7.A.1).

7.C - Randomizations

7.C.1 - Rotation

Arrangement of Boundary (§7.A.2) is arbitrary.

8 - Elevation

8.A - Wilderness

This section is intentionally left blank.

8.B - Boundary

This section is intentionally left blank.

8.C - Passage

This section is intentionally left blank.

9 - Terrain

9.A - Wilderness

The Wilderness shall consist of open land terrain with scattered forests. A narrow trampled ribbon shall lead from the *Origin of Player Lands* to the Passage defined in §7.A.3.

9.B - Boundary

The Boundary shall consist of forest terrain with single-tile thickness.

9.C - Passage

The Passage shall consist of open land terrain, connecting the ribbons described in §9.A with their self-same surface.

10 - Objects

10.A - Starting Units

Each player shall start the game controlling objects defined by Table 10.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Herdable	<u>GSRM-FIW-1</u>	2 to 3	4
Villager	~	6	3
Harmful Scout	<u>GSRM-FIW-1</u>	7 to 8	1

Table 10.A: Starting Player-Controlled Objects

10.B - Boundary

Trees within the Boundary shall contain a randomly assigned amount of stored wood, between 50 and 500.

10.C - Wolf Pack

Non-trampled terrain within the Passage (§7.A.3) shall contain predators of significant density variation (typically 1 animal per 4 to 12 tiles). In this way the cost-benefit calculus of a convenient wall is random.

10.D - Resources

This section is intentionally left blank.

10.E - Indian Village

Opposing corners of the map shall contain an Indian Village per GSRM-FIW-1.
