1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>STND-001</u>	Procurement Process, AOE2 Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *CSRM* – (C)omponent (S)pecification for (R)andom (M)ap: A technical document defining the needs for each map sourced specifically for the competition. Supersedes any general specifications, in the case of conflicting requirements.

3 - Overview

This specification describes a process for selecting maps from previous seasons of Alchemy League, allowing players the opportunity to replay in a competitive setting.

4 - Procurement

Where applicable, maps shall be sourced according to the procedure defined by STND-001.

5 - Map Organizer

Direct all questions to TechChariot on discord.

6 - Selection Process

6.A - Nomination Phase

6.A.1 - Nominator Qualifications

6.A.1.a - Server Presence

Nominations only accepted for persons who are a member of the Alchemy AOE community server during the entire map selection process.

6.A.1.b - No Other Nominations

Only one nomination accepted per server member.

6.A.2 - Map Qualifications

The following sections describe the requirements for maps to be nominated.

6.A.2.a - Previous Season

The random map shall have been a part of the map pack for a previous season of the league. Maps that were designed for a previous season but not included are ineligible.

6.A.2.b - Component Specification

The random map shall possess a component specification (*CSRM*) updated to the latest format, particularly autownload links courtesy of the RedirectLatest webpage. Sample format as follows: [https://Alchemy-AOE-Community.github.io/RedirectLatest.html?file=\[INSERT FILENAME\]](https://Alchemy-AOE-Community.github.io/RedirectLatest.html?file=[INSERT FILENAME]) . Simple revisions to the *CSRM* are allowed if map identity would not change.

6.A.2.c - Author Coordination

The random map shall have the backing of a map scripter known as the "Update Creator", approved by its original creator, and committed to the process described in this specification. The purpose of this role is to update the map as required, to be compliant with latest requirements and/or make improvements.

6.A.2.d - Second & Third

The random map shall have Second and Third nominators who are members of the Alchemy server. Any one person may only Second or Third up to two maps.

6.A.2.e - No Role Overlap

No aforementioned roles may overlap, with exception of Original Creator and Update Creator. Thus, a map creator cannot nominate or their own map, or second, etc.

6.A.3 - How to Nominate

The nominator shall post a message in the appropriate channel of the Alchemy server containing the following information:

- Original Creator: @Original_Creator
- Update Creator: @Update_Creator
- Second: @Second
- Third: @Third
- CSRM in Published Specs Github: [URL]
- Location of Map in Creation Github: [URL]

To these tags and internet links shall be attached two images:

- Map Overview
- Conversation history with original creator showing commitment to update the map or consent for another to modify as needed, and their commitment.

The posting may be edited until the end of Nomination Phase to incorporate required information. For example, if a map is nominated but does not yet have a CSRM, then this field can be initially left blank, and updated when the specification is written and released. It is recommended that “Second” and “Third” react to the nomination post to prove their agreement, thus expediting the process.

6.B - Check Phase

The Map Organizer shall review each nomination to confirm that it contains correct and complete information, as listed in §6.A.3. Maps with outdated specifications, inaccessible resources, or missing information will be rejected.

6.C - Feedback Phase

The Map Organizer shall open a thread in the community's public forum for each Map that survived §6.C. The purpose of the thread is to give all players the chance to discuss each nominated map, and offer suggestions for improvement based on experience playing. Feedback should consist of minor alterations working within established characteristics. For instance, "boars were too far away" OR "less fish" are simple adjustments unlikely to conflict with any written map requirements, whereas something like "remove the lake in the center" is unlikely to be actionable. The nomination team for each map (Nominator, Second, Third, Original Creator, Update Creator) shall debate/entertain each suggestion during this phase, and make "good faith" commitments to incorporate feedback, including minor changes to the *CSRM* if necessary.

6.D - Update Phase

After the close of feedback phase, a period of time is allotted, whereby commitments to improve per §6.C are implemented. During this phase, the nomination team shall fill out a compliance matrix for the map, affirming that the map satisfies the requirements of its *CSRM*, including general specs. & standards. This includes "exclusivity", in case the map was uploaded to the official mod workshop since its use in the league, as well as any standards that may have been revised since the map was last played. In this way, league players can be assured the same level of quality and commitment to continuous improvement as the first time the map appeared. If the map or requirements have little or no change, similarity arguments may be used to demonstrate compliance.

6.E - Inspection Phase

The Map Organizer shall appoint a team or personally evaluate each updated map per §6.D.

6.F - Voting Phase

An online poll shall be created from qualified nominations, inviting participants to score all eligible maps between 1 to 10, with 10 indicating strongest possible agreement with the following statement: “This is the best map produced by Alchemy League so far”. The scores for the maps shall be averaged after the poll closes.

7 - Selections

7.A - Map Pack

The Map Pack shall consist of the top “X” scoring maps from §6.F where “X” is two times the number of rounds in the tournament, OR all eligible nominations, whichever quantity is less.

7.B - Featured Maps

The Map of the Round shall be selected from top scores of §6.F, without repeats. If the number of rounds in the tournament exceeds the number of scored maps, then the Map Organizer shall decide the remainder.

8 - Rewards

Total prizes shall be divided equally among Featured Maps.
