# 1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

| Specification Number | Nomenclature                            |
|----------------------|-----------------------------------------|
| <u>MTHD-002</u>      | Calculation, Tournament Elo             |
| <u>MTHD-003</u>      | Elo Correction, Handicap                |
| <u>MTHD-004</u>      | Discipline, Pa2 Round Robin             |
| <u>MTHD-005</u>      | Winner Selection, Round Robin           |
| <u>MTHD-006</u>      | Earnings, Round Robin                   |
| <u>MTHD-007</u>      | Structure, Single Division Stack League |
| <u>STND-005</u>      | Competition, General Rules              |

*Table 1: Bill of Materials*

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

# 2 - Background

The *Alchemy Alliance (ALAL)* is a free and non-profit organization of random map scripters, tournament hosts, content creators, and skilled players dedicated to the advancement of custom random maps in Age of Empires II: Definitive Edition. As the nucleus of the *Alchemy AOE Community*, the *ALAL* publishes quality standards for custom random maps, and curates the finished products to be featured into thematic competitions where adventuresome players may exhibit creative strategies for maximum entertainment value.

### 3 - Overview

This handbook describes Alchemy League, an Age of Empires II 1v1 competition hosted by the *Alchemy Alliance* with the following unique features, summarized in reference below:

- Participants will generally not face an opponent 300 elo higher than they are without handicap.
- Cutting-edge tournament elo calculation from online match history, based on weighted average and refactored to account for win rate. Player statistics also adjusted according to performance in previous league seasons, where required.
- Handicap used sparingly to include extremities of bell curve, so that no player will be turned away based on skill.
- Unique bracketing structure & prize distribution.
- Standard Victory Condition on a Custom Map Pool.

### 4 - Prize Money

Prize Money Details per Table 4 below

| Title                       | Amount    | Details                                                                                                                               |
|-----------------------------|-----------|---------------------------------------------------------------------------------------------------------------------------------------|
| Winners per Sprint          | 8         | Top Performers per <u>MTHD-005</u>                                                                                                    |
| Prizes, Players of Sprint 1 | \$92 USD  | Distribution per <u>MTHD-006</u>                                                                                                      |
| Prizes, Players of Sprint 2 | \$172 USD |                                                                                                                                       |
| Skill Bias Exponent         | 1.25      |                                                                                                                                       |
| Payment Platform            | ~         | <u>Paypal</u> (direct USD) or Solana (indirect, but cheaper) transfer to platform of choice (Paypal, Kraken, Coinbase, Binance, etc.) |
| Country of Payment Origin   | ~         | United States of America                                                                                                              |

| Number of Divisions | 1   | 1   | Round Robin per <u>MTHD-007</u> .                                                                                                                                                                                                                                                                                                                                      |
| Number of Sprints   | 2   | 2   |                                                                                                                                                                                                                                                                                                                                                                        |
| Rounds per Sprint   | 4   | 4   |                                                                                                                                                                                                                                                                                                                                                                        |
| Games per Round     | 2   | 3   | After completing the minimum number of required games, players may mutually agree to continue playing until the maximum number of games has been reached, regardless of results from previous games. Submission of a recorded game file is the only accepted evidence of consent. All games played in this format will be used to calculate league results and payout. |

Table 6: League Format Information

## 7 - Tournament Elo

| Title                                 | Details                                                                                                                                                                     |
|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data Collection, Step 1               | Reference internet APIs to garner all alternate or “smurf” accounts corresponding to the same player, derived through IP address, Steam account sharing, and other methods. |
| Data Collection, Step 2               | Reference internet APIs to harvest all relevant match history corresponding to each of the accounts gathered from the previous step.                                        |
| Average Ranked Elo, Formula           | Calculated from 100 most recent games, linearly weighted per <u>MTHD-002</u> .                                                                                              |
| Average Ranked Elo, Confidence Window | Perform a tolerance sweep on win rate and elo fluctuation over history to estimate a range of possible tournament elos for each participant, with 100% confidence interval. |
| Average Ranked Elo, Final Value       | Take average ranked elo as the $\frac{3}{4}$ point going from minimum to maximum within confidence window.                                                                  |
| Tournament Elo, final Value           | Average Ranked Elo ( $\frac{3}{4}$ point) adjusted for returning players inactive in ranked.                                                                                |
| Handicap                              | For each matched set of players, 100 shall be added to the lower of two elos and then <u>MTHD-003</u> applied to determine corrective handicap.                             |

*Table 7: Tournament Elo Information*

## 8 - Custom Map Information

| Title                        | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Map Qualities                | Custom Map titles and properties per <a href="#">Appendix A</a> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Featured Map                 | For each non-wild round, the tournament host will declare a map from the pool to be “Map of the Round”. A map cannot be “Map of the Round” twice in the same season of the league.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Obtaining Maps               | <p>To protect creator intellectual property rights, the Alchemy AOE Community does not upload competition resources to the in-game mod center. Participants shall download and execute the following batch script to automatically gain access to latest Alchemy League maps in game: <a href="#">Download .bat file here</a>.</p> <p>The Alchemy AOE Community server is webhook-configured to notify players of any changes to the random map Github repository –the source of the custom map pool. Players are responsible for making sure they are using the latest versions by re-running the batch script whenever a relevant map is changed.</p> <p>Note that the batch script works only for Windows users. If a participant has a different operating system, tournament staff will assist as needed.</p> |
| Map Selection, Round Wild    | For the Round Wild, both players declare a home map. Then, they take turns discarding the remaining maps. If a third game is played, it shall be on the map discarded last.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Map Selection, Rounds Normal | The first map is the “Map of the Round”. Then, players take turns discarding the remaining maps until only two remain. The second game is played on a map randomly selected from the remainder. The unchosen map shall be used for a third game, if played. Draft Link provided in Tournament Server.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## A. APPENDIX – Map Properties

The following Classic Standard Maps were downloaded from 2020 game data, and prefixed with “MWDMA”, standing for “A Million Ways to Die in the Middle Ages”:

- MWDMA\_Arabia
- MWDMA\_Archipelago
- MWDMA\_Arena
- MWDMA\_Black\_Forest
- MWDMA\_Continental
- MWDMA\_Gold\_Rush
- MWDMA\_Highland
- MWDMA\_Mongolia
- MWDMA\_Oasis
- MWDMA\_Rivers
- MWDMA\_Salt\_Marsh
- MWDMA\_Yucatan

These maps were modified to give players a Fortified Tower at least 30 tiles away from starting Town Center, then rule changes were added to enable the maximum number of possible non-exclusive win conditions, listed below:

- Control Monument Until Years = 0
- Destroy Enemy King
- Destroy Enemy Town Center

- Destroy Enemy Fortified Tower
- Control All Relics Until Years = 0
- Control a Wonder Until Years = 0

The following additional rule changes were added:

- Game aborts after launch if any of the following lobby options were true:
  - Sudden Death box unchecked
  - Regicide box unchecked
  - King of the Hill Game Mode Unselected
  - Empire Wars box checked
  - Resources are not “Standard” or “Low Resources”.

In this way, participants are prevented from accidentally playing on incorrect settings.

- Player-Assigned Fortified Towers have random health between [950, 1425] hit-points, different each game.
- Player-Assigned Fortified Towers have 50% chance of base range 9, and 50% chance of base range 10, different each game.
- Player-Assigned Fortified Towers surrounded by ring of walls of random type (different each game), breakdown as follows:

| Probability | Wall Type          |
|-------------|--------------------|
| 35%         | Palisade           |
| 30%         | Fortified Palisade |
| 20%         | Stone              |
| 15%         | Fortified Stone    |

- Monuments do not provide bonus resource trickle.
- Players start with an unmodified petard instead of a traditional scout.

The following images are provided for reference:

Finally, it should be noted that the maps for this event are procured outside the usual Alchemy AOE Quality system (due to time constraint of revising the ALS8 plan no fewer than thrice), and due to their background as “throwback classics”, they can be expected to result in a number of unfair generations – generally acceptable in 2020 but not by the standards of today.

It is the hope of the Alchemy AOE Alliance that registrants in ALS8 and community members can help identify the most pressing issues in the listed maps, at least eight of which will be selected for play once Season 8 begins. It is also our belief that the numerous win conditions will result in games that end before most unfairness can be exploited.
