1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-AK-3</u>	General Requirements, Alaska Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines requirements for a Coastal-style tundra map representing Prudhoe Bay in an Alaska map pack.

4 - General Characteristics

The requirements of GSRM-AK-3 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Prudhoe Bay shall be arranged per Figure 6 below:

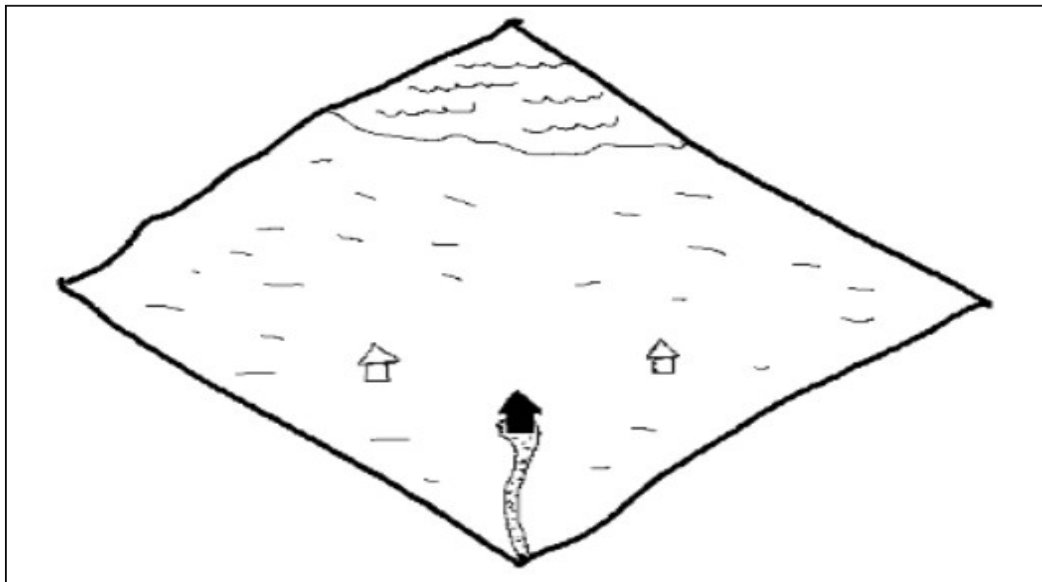

Figure 6: Prudhoe Bay Configuration

This map shall include the Arctic Ocean and the North Slope tundra. A neutral trade workshop shall be placed on the opposite side from the Arctic Ocean and approximately equidistant from the two players' starting locations. A gravel road shall connect the trade workshop to the closest map edge and shall be littered with non-interactive and unconvertible gaia cobra cars.

6.A - Zoning (Definitions)

Two zones are established, described as follows:

6.A.1 - Oceanic

Large blue area intersecting more than 10% of any map edge, and any azure area enveloped by that blue area.

6.A.2 - Player Lands

Any area that is not Oceanic. Contains the *Origin of Player Lands*.

6.B - Randomizations

Figure 6 illustrates that Prudhoe Bay is a coastal setting featuring the Arctic Ocean.

6.B.1 - Rotational

The map shall include variation to place the Arctic Ocean on the highest corner of the map, rotated within $\pm 45^\circ$.

6.B.2 - Seasonal

Seasonal variation shall alter the ratio of ice to liquid water on the entire map, strongly influencing fishing/naval investment. Probabilities as follows:

- 30% chance of mostly thawed Arctic Ocean.
- 70% chance of mostly frozen Arctic Ocean.

7 - Elevation

Prudhoe Bay shall not have any elevation higher than 2, keeping with the relative flatness of Alaska's North Slope.

7.A - Oceanic

The Arctic Ocean shall be elevation 0.

7.B - Player Lands

Player Lands shall vary from elevation 0 to elevation 1, with sparse mounds reaching elevation 2.

8 - Terrain

Prudhoe Bay land terrains shall consist of barren tundra and snow in any combination, depending on the seasonal variation described in §6.B.2.

8.A - Forests

Prudhoe Bay lies far north of the Arctic tree line. Trees graphics (even snowy pines) are forbidden. Snowy shrubs and bush forests shall be used in place of traditional groups of trees.

8.B - Ice Floes

Sea ice terrain shall be selected to create random obstacles in ship navigation, the number of which depend on the seasonal variation described in §6.B.2.

8.C - Ponds

Ponds satisfying the following conditions shall be scattered across player lands:

- Terrain type: Ice or liquid water
- Size: Any single pond shall not exceed 5% of the total length of the map,
- Area: The total area of all ponds shall not exceed 30% of the total area of Player Lands.
- Elevation: Height limits 0 to 1.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Per Applicable Specification	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	~	0	1
Sheep	~	2 to 3	4
Villager	~	6	3
Harmful Exploration Unit	<u>GSRM-AK-3</u>	6 to 8	1

Table 9.A: Starting Player-Controlled Objects

9.B - Resources

Starting player resources shall be standard. Fish in the ocean shall be plentiful.
