If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- **PSRM** – (P)rourement (S)pecification for (R)andom (M)ap: A technical document defining the procurement process for a group of maps to be used in a competition, including a list of maps, creators, contest descriptions, compensation, etc.
- **STND** – Standard. A document that provides definition for an important and commonly recurring feature but does so in a generalized way, which could be used for a variety of applications. For this reason, standards usually do not call out specific communities or events.
- **Map Organizer** – A person who arranges the development of an entire map pack to be used in a competition. The Map Organizer consults as needed with the Competition host to disposition any maps that do not conform to established requirements and determines, in his/her discretion – with input from subject-matter experts – the state of readiness for any map listed herein.
- **CSRM** – (C)omponent (S)pecification for (R)andom (M)ap: A technical document defining the needs for each map sourced specifically for the competition. Supersedes any general specifications, in the case of conflicting requirements.

3 - Background

An Alaska-themed map pack was played in Q4 of 2024 and consisted of AK-01 through AK-09, except AK-05. The community voted these maps as the finest offered by Alchemy League to date, and delivered a mandate to modernize and improve them, as well as incorporate concepts that were not used last time due to time/budget constraints.

4 - Overview

This document provides definition for a custom Age of Empires II map pack themed on Alaska [AK] (a dominion of the arctic Northwestern United States) and intended for use in an Alchemy League Competition.

5 - Procurement

Where applicable, maps shall be sourced according to the procedure defined by STND-001.
