3 - Overview.....	2	6 - Navigation/Licensing.....	3

1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>STND-002</u>	General Requirements, Random Maps
<u>STND-003</u>	Competitvity Scoring, Random Maps
<u>STND-004</u>	Program Reqs., Alchemy AOE Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *STND* – Standard. A document that provides definition for an important and commonly recurring feature but does so in a generalized way, which could be used for a variety of applications. For this reason, standards usually do not call out specific communities or events.
- *High Variety Style Map* – A random map that introduces large variation in design-critical terrains accessible and interactive with players. The nature of such randomness assures an inability to predict competent civilizations or strategies prior to exploration of the map (E. G. Megarandom).

3 - Overview

This document defines general characteristics for high-variety style maps that may be used in an Alchemy AOE Alliance competition.

4 - General Requirements

Maps shall satisfy the general requirements of STND-002.

5 - Competitiveness

Maps shall score a minimum of 100 when evaluated for “Competitiveness” through the process of STND-003.

6 - Navigation/Licensing

Maps shall satisfy the programmatic requirements of STND-004.
