1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-ESR-1</u>	General Requirements, ES Remastery

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.

3 - Overview

This component specification defines requirements for a remastered Prairie to be used in a Remastered Ensemble Studios Map Pack.

4 - General Characteristics

The requirements of GSRM-ESR-1 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Prairie shall be arranged per Figure 6 below:

Figure 6: Prairie Configuration

In this way, four zones are established, described as follows:

6.A - Ocean

Blue area near the corners of the map.

6.B - Inland

Green area inside the pink star.

6.C - Player-Land

Green area outside the pink star.

6.D - Outland

Any area not belonging to the other aforementioned zones.

7 - Elevation

7.A - Ocean

The Ocean shall be elevation 0.

7.B - Inland

The Inland shall be elevation 5.

7.C - Player-Land

Player-Lands shall be elevation 5 with sparse knolls of elevation 6.

7.D - Outland

The Outland shall be elevation 0 where bordering the Ocean, but steeply transition to elevation 5 elsewhere, but may have sparse knolls of elevation 6.

8 - Terrain

8.A - Ocean

The Ocean shall consist of water terrain where appropriate, but unique land terrain on desert/mountain biomes, etc.

8.B - Inland

Inland terrain shall be grassy land, with scattered small forest patches of bush and reed-like trees in groups of 2-4, spaced at least 8 tiles apart.

8.C - Player-Land

Player-Lands shall allocated 70 – 90 trees to each player, distributed across 2 – 3 forests, and spaced at least 14 tiles from the origin of those player lands.

8.D - Outland

The Outland shall be dirty land, with scattered forests of 25-35 trees each, spaced 5-25 tiles apart. Outland terrain shall transition to rocky as it drops in elevation to meet the Ocean.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	0	1
Sheep	5 to 7	2
Villager	4 to 6	3
Scout	6	2

Table 9.A: Starting Player-Controlled Objects

9.B - Ocean

Deep fish are prohibited.

9.C - Inland

The Inland region shall contain only bonus deer, with no other resources.

9.D - Player-Land

Player-assigned resources shall be scant on this map, in emulation of the original Prairie. No boars shall be present, but each player shall instead have two patches, each containing 4 deer.

9.E - Outland

The Outland region shall contain bonus stone and gold piles, as well as berries and relics. No deer allowed.
