If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Background

The *Alchemy Alliance (ALAL)* is a free and non-profit organization of random map scripters, tournament hosts, content creators, and skilled players dedicated to the advancement of custom random maps in Age of Empires II: Definitive Edition. As the nucleus of the *Alchemy AOE Community*, the *ALAL* publishes quality standards for custom random maps, and curates the finished products to be featured into thematic competitions where adventuresome players may exhibit creative strategies for maximum entertainment value.

3 - Overview

This handbook describes Alchemy League, a unique Age of Empires II 1v1 competition hosted by the *Alchemy Alliance*. As the most advanced AOE2 tournament in the world, Alchemy League boasts “big data” averaging of ranked elo calculation, a trade-secret single division stack matchmaker, and prizes awarded to players who most over-perform predictions. For maximum variety and entertainment, Alchemy League is played on Custom Maps with Standard Victory conditions.

6 - League Format

Title	Min	Max	Details
Team Size	~	~	1v1
Division Count	1	1	Round Robin per <u>MTHD-007</u> .
Number of Sprints	3	3	
Rounds per Sprint	[3,3,5]	[3,3,5]	
Games per Round	2	3	For each round, competing players agree on the number of games they want to play. That number must be greater than or equal to the minimum, and less than or equal to the maximum. Players may decide at any point during their set how many games to play, but once a game has begun, it cannot be aborted to prevent a loss. All games played in this format shall inform results and payout calculation.
Early Play Option	~	~	Returning League Players who will be traveling or otherwise unavailable for an extended period of time, eclipsing the majority of any one Round may request to play their set early. All participants shall accommodate exceptions granted in this manner. If the tournament assigns a map for that Round, it shall apply regardless of when the set is played. Only one exception per player may be granted by the tournament host per Sprint, and the early play option shall be requested <i>prior to registration</i> . In this way, a player may decline to register if exception is not granted.

Table 6: League Format Information

7 - Tournament Elo

Title	Details
Data Collection, Step 1	Reference internet APIs to garner all alternate or “smurf” accounts corresponding to the same player, derived through IP address, Steam account sharing, and other methods.
Data Collection, Step 2	Reference internet APIs to harvest all relevant match history corresponding to each of the accounts gathered from the previous step.
Average Ranked Elo, Formula	Calculated from 100 most recent games, linearly weighted per <u>MTHD-002</u> .
Average Ranked Elo, Confidence Window	Perform a tolerance sweep on win rate and elo fluctuation over history to estimate a range of possible tournament elos for each participant, with 100% confidence interval.
Average Ranked Elo, Final Value	Take average ranked elo as the $\frac{3}{4}$ point going from minimum to maximum within confidence window.
Tournament Elo, final Value	Average Ranked Elo ($\frac{3}{4}$ point) adjusted for returning players inactive in ranked per <u>MTHD-009</u> .
Handicap	For each matched set of players, 100 shall be added to the lower of two elos and then <u>MTHD-003</u> applied to determine corrective handicap.

8 - Custom Map Information

Title	Details
Map Qualities	Super Random Custom Maps per <u>PSRM-RAND-1</u> .
Featured Map	For each non-wild round, the tournament host will declare a map from the pool to be “Map of the Round”. Unless there are more rounds than available maps, a map cannot be “Map of the Round” twice in the same season.
Obtaining Maps	To protect creator intellectual property rights, the Alchemy AOE Community does not upload competition resources to the in-game mod center. Participants shall download the latest Alchemy League map scripts and place them in a folder suitable for integration into the game. Recommended approach (~30 seconds): download and run the following open-source batch script: <u>Download .bat file here</u>. This executable was written by the community to automatically download and move the latest version of each map in the pack from the online repository to the correct location. It is used by most players. Direct control (~2 minutes): download the “Map_Archive” zip file from the Alchemy AOE Season web-page and unzip to the appropriate game folder. Note that the direct download is required for non-Windows users. The Alchemy AOE Community server is webhook-configured to notify players of any changes to the random map Github repository –the source of the custom map pool. Players are responsible for making sure they are using the latest versions by re-downloading after a map is updated. Tournament staff are eager to assist as needed.
Map Selection, Round Wild	Each player selects a home map, then they take turns discarding the remainder from the available draft. If additional games are played, then the maps used are in reverse order of the discard.
Map Selection, Rounds Normal	The first map is the “Map of the Round”. Then, players take turns discarding the remaining maps until only one remains, which the second game is played on. If additional games are played, then it is selected from the available pool by whoever currently has fewer wins in that set, OR by the lower seed, if players are tied.
