1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>GSRM-ESR-1</u>	General Requirements, ES Remastery

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *Origin of Player Lands* – Location of town center.
- *Straggler Tree Laming* – The act of removing a tree object without investing time to deplete its stored resources. Achieved through placement and partial construction of a building atop a felled tree object, then deleting the foundation, opening a path for units to pass.

3 - Overview

This component specification defines requirements for a remastered Sherwood Forest to be used in a Remastered Ensemble Studios Map Pack.

4 - General Characteristics

The requirements of GSRM-ESR-1 apply unless superseded by this specification.

5 - Rule Changes

This section is intentionally left blank.

6 - Land Configuration

Sherwood Forest shall be arranged per Figure 6 below:

Figure 6: Sherwood Forest Configuration

In this way, three zones are established, described as follows:

6.A - Ponds

Scattered blue splotches, avoiding the origins of player lands by at least 28 tiles.

6.B - Player-Lands

Any area within 24 tiles of the *Origin of Player Lands*.

6.C - Countryside

Any area not belonging to the other aforementioned zones.

7 - Elevation

7.A - Ponds

The Ponds shall be at elevation 0.

7.B - Player-Lands

Player Lands shall be at elevation 1.

7.C - Countryside

The Countryside shall be at elevation 1, with scattered hills.

8 - Terrain

8.A - Ponds

The Ponds shall consist of beachless water (15), and be therefore undockable.

8.B - Player-Lands

Player Lands shall consist of any open land terrain, with 2 – 3 player-assigned forests.

8.C - Countryside

The Countryside shall consist of open land terrain, particularly leaves or dirt, as would be common in a large forest. Additionally, this zone shall be littered with small forest patches, of no more than 8 trees per patch.

9 - Objects

Most objects are at the discretion of the map creator, balancing thematic interests against strategic variety. The explicit requirements for this map are few but listed below.

9.A - Starting Units

Each player shall start the game controlling objects defined by Table 9.A:

Object	Distance from <i>Origin of Player Lands</i> [tiles]	Quantity
Town Center	0	1
Sheep	2 to 3	4
Villager	6	3
Scout	6	1

Table 9.A: Starting Player-Controlled Objects

9.B - Countryside

Prior to application of additional resources (gold, stone, forage, hunt, etc.), a large number of tree objects shall be placed in the countryside. These tree objects shall fill-in the map such that it resembles a real-life forest, with small gaps between trees, and occasional openings for meadows. These tree objects shall be indiscernible from the terrain trees described in §8.C, both in skin and on the minimap, thus introducing the possibility of unexpectedly entering a walled area by *Straggler Tree Laming*.
