6 - Navigation/Licensing.....	3	7.E - Starting Scout.....	3

1 - Referenced Documents

Table 1 below is a list of all specifications that are components to this one. Each of its entries were designed as an interchangeable part, to be used in context for this specification, or others like it:

Specification Number	Nomenclature
<u>STND-002</u>	General Requirements, Random Maps
<u>STND-003</u>	Competitiveness Scoring, Random Maps
<u>STND-004</u>	Program Reqs., Alchemy AOE Maps

Table 1: Bill of Materials

If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Definitions

The following definitions apply:

- *STND* – Standard. A document that provides definition for an important and commonly recurring feature but does so in a generalized way, which could be used for a variety of applications. For this reason, standards usually do not call out specific communities or events.

3 - Overview

This document defines general concepts and styles for supplier-designed & remastered “Ensemble Studios Original” maps to be used in an Alchemy AOE Alliance competition.

4 - General Requirements

The requirements of STND-002 apply unless superseded by this specification.

5 - Competitiveness

Maps shall score a minimum of 100 when evaluated for “Competitiveness” through the process of STND-003.

6 - Navigation/Licensing

Maps shall satisfy the programmatic requirements of STND-004.

7 - General Design

7.A - General Look and Feel

The Ensemble Studios Remastered (ESR) Map shall retain the general “look and feel” of its original, with only modest improvements to their competitive variety.

7.B - Elevation & Cliffs

The ESR Map shall scale elevation and (where applicable) cliffs to map size, such that density remains relatively unchanged.

Where practicable, all non-navigable terrain shall be elevated a minimum of 1 over navigable terrain at elevation 0, providing an advantage to land-units over ships.

7.C - Aesthetics

The ESR Map shall implement improvements to visual appeal provided by the game since its original development, including new objects, terrains, and terrain masking.

7.D - Seasonal Variation

The ESR Map shall provide a minimum of four seasonal or five biome variations of approximately equal probability. Such variation shall be entirely cosmetic, with no bearing on how the map would play out (E. G. A frozen version of “Baltic” becoming “Ghost Lake”, removing ships and complicating walling, making for a different experience).

7.E - Starting Scout

The ESR Map shall impart no starting units to players that are capable of dealing damage, converting, or healing, with the following exceptions:

- Scout Cavalry (448), Eagle Scout (751), or Camel Scout (1755)
- Any **Villager Class** economic unit, such as “villager”, “builder”, “farmer”, etc.
