If any part of any documents listed in Table 1 conflict with this specification, then this specification shall assume priority.

2 - Background

The *Alchemy Alliance (ALAL)* is a free and non-profit organization of random map scripters, tournament hosts, content creators, and skilled players dedicated to the advancement of custom random maps in Age of Empires II: Definitive Edition. As the nucleus of the *Alchemy AOE Community*, the *ALAL* publishes quality standards for custom random maps, and curates the finished products to be featured into thematic competitions where adventuresome players may exhibit creative strategies for maximum entertainment value.

3 - Overview

This handbook describes Alchemy League, an Age of Empires II 1v1 competition hosted by the *Alchemy Alliance* with the following unique features, summarized in reference below:

- Participants will generally not face an opponent 300 elo higher than they are without handicap.
- Cutting-edge tournament elo calculation from online match history, based on weighted average and refactored to account for win rate.
- Handicap used sparingly to include extremities of bell curve, so that no player will be turned away based on skill.
- Unique bracketing structure & prize distribution.
- Standard Victory Condition on a Custom Map Pool.

4 - Prize Money

6 - League Format

Title	Min	Max	Details
Team Size	~	~	1v1
Number of Divisions	1	1	Round Robin per <u>MTHD-007</u> .
Number of Sprints	2	2	
Rounds per Sprint	4	4	
Games per Round	2	3	After completing the minimum number of required games, players may mutually agree to continue playing until the maximum number of games has been reached, regardless of results from previous games. Submission of a recorded game file is the only accepted evidence of consent. All games played in this format will be used to calculate league results and payout.

7 - Tournament Elo

Title	Details
Data Collection, Step 1	Reference internet APIs to garner all alternate or “smurf” accounts corresponding to the same player, derived through IP address, Steam account sharing, and other methods.
Data Collection, Step 2	Reference internet APIs to harvest all relevant match history corresponding to each of the accounts gathered from the previous step.
Tournament Elo, Formula	Calculated from 100 most recent games, linearly weighted per <u>MTHD-002</u> .
Tournament Elo, Confidence Window	Perform a tolerance sweep on win rate and elo fluctuation over history to estimate a range of possible tournament elos for each participant, with 100% confidence interval.
Tournament Elo, Final Value	Take tournament elo as the $\frac{3}{4}$ point going from minimum to maximum within confidence window.
Handicap	For each matched set of players, 100 shall be added to the lower of two elos and then <u>MTHD-003</u> applied to determine corrective handicap.

Table 7: Tournament Elo Information

8 - Custom Map Information

Title	Details
Map Qualities	Thematic map pool satisfying the requirements of PSRM-SMT-1.
Featured Map	For each non-wild round, the tournament host will declare a map from the pool to be “Map of the Round”. A map cannot be “Map of the Round” twice in the same season of the league.
Obtaining Maps	To protect creator intellectual property rights, the Alchemy AOE Community does not upload competition resources to the in-game mod center. Participants shall download and execute the following batch script to automatically gain access to latest Alchemy League maps in game: <u>Download .bat file here</u>. The Alchemy AOE Community server is webhook-configured to notify players of any changes to the random map Github repository –the source of the custom map pool. Players are responsible for making sure they are using the latest versions by re-running the batch script whenever a relevant map is changed. Note that the batch script works only for Windows users. If a participant has a different operating system, tournament staff will assist as needed.
Map Selection, Round Wild	For the Round Wild, both players declare a home map. Then, they take turns discarding the remaining maps. If additional games are played beyond the first two, then maps are chosen in reverse order of those discarded.
Map Selection, Rounds Normal	The first map is the “Map of the Round”. Then, players take turns discarding the remaining maps until only two remain. The second game is played on a map randomly selected from the remainder. If additional games are played, their map is chosen randomly from any that has not yet been played in the set.
